SEATTLE, Wash., March 18 .- While there is difference of opinion regarding the probable output of the Tanana district this season, miners who have spent the winter in the country and visited the most of the diggings. re confident that it will not fall below the Klondike yield and that Clary and Fairbanks creeks will equal Eldorado in its best days. No. 1 on Fairbanks is regarded as among the best on the creek. This mine is owned by the Shepard brothers, two colored boys, who once worked as ship carpenters at Winslow, across the bay from Seattle. They have taken out \$300,000 in dust and estimate from the ground they have worked over, that they have at least six years work before

other miners from Seattle in the Fairbanks district report that good luck has been with them since going to the Tanana, some working in open cuts taking out as high as \$3,000

per day. The owners of the tin ore shipped from the mines of Cape York, Alaska, last fall, were disappointed in getting Seattle capital interested in the construction of a reduction plant, and sent part of the output to Belgium by steamer from this port. The work of mining the metal will, however, be carried

Snow in the mining districts of the Cascade Range, which is usually from fifteen to twenty feet deep at this season of the year. is now but three and four feet deep. The weather is as warm as in midsummer, with regetation at least six weeks early. This is stimulating the miners and prospectors, and the rush to the mountains is general.

WASHINGTON.

SEATTLE, March 13 .- An important strike Apex mine, Money Creek district, Thurs-Apex mine, Money Creek district, Thursday last. This property is in King county, forty miles east of Seattle, on the Great Northern Railroad, and has been under development for several years past. The strike was made on the fourth level at a depth of 1,000 feet. The ore body uncovered to the foot in width and 200 feet in length. is three feet in width and 200 feet in length, assaying \$50 in gold and paralleling another vein of similar width, but of lower grade, assaying \$25 silver and \$25 gold to the ton.

Negotiations are under way for the pur-chase of the silver-lead mines owned by Joe Rigbey in the Cascade district, on the headwaters of Skagit River. The intending purchasers are New York men who are familiar with the district. NEVADA.

RENO, March 13.-Interest of mining men of this coast now centres in the new Nevada mining camps, which threaten to be overrun by Easterners this spring. The latest reports show that more than "00 people are going into Goldfield ever" ar and, though more than half of these soon depart for Bullfrog and other newer districts, the remnant will soon overcrowd the town. There is likely to be great suffering in the district. Transportation facilities are still very crude and only last week Goldfield and Tonopah came very near having a famine in fuel oil, which yould have shut down the mines and thrown

would have shut down the mines and thrown a thousand men out of work.

The ore shipments from Tonopah last week amounted to 1,684 tons, of which the Tonopah company shipped 945 tons. The Midway next week will ship fifty tons of \$200 ore.

The reports from Bullfrog indicate an increase of the excitement over rich strikes. Judge O. L. Ray has sold one claim of his group, situated just west of the Bullfrog property, for \$100,000.

The mines of Pioche, a camp which has been practically dead for twenty years, will soon be reopened. The Pioche mines did not peter out, but the cost of milling was so great, owing to high freight-charges, that the ore could not be handled with profit. Now the opening of the new Salt Lake and Los Angeles Railroad has brought Pioche near to the line and low grade ores can be handled profitably.

A British syndicate has secured the Key-

profitably.

A British syndicate has secured the Keystone group of mines at Good Springs for \$337,500. The mines have produced much gold, but lately they have been worked only at intervals because of the difficulty of milling

the ore.
GOLDFIELD, March 15.—The week's sensadon is a strike at Tokop, thirty miles south
of Goldfield, half way on the road to Bull-

frog.

Abe Hansom has opened up a ledge two and one-half feet on the Commander claim that averages clear across \$2.884.60.

The property of the Tokop tiold Mining Company consists of five full claims. They were recently taken up by John Reynolds and L. Bleakmore of Goldfield and turned over to the company. The rich strike on the and L. Bleakmore of Goldfield and turned over to the company. The rich strike on the Commander is 300 feet away from the Tokop Gold Mining Company's property, and the ledge is traced through to the property by a cut ten feet deep. Assays from this cut along the line show values as high as \$264.

Tokop is an old mining country, where Government surveys were made as far back as 1871. In the archives of the War Department, a report in the "Explorations in Nevada and Arizons," by Lieut. George M. Wheeler of the United States Corps of Engineers, tells of the Tokop country. At that time several properties were being worked by arastras, and the ore on the surface had to assay upward of \$300 a ton to be worth mining at all, since the nearest railroad station was Big Pine, over 120 miles away, and the capacity of the arastras was not two tons a day.

John McKane, representing Charles M. Schwab, is endeavoring to get an option on the Abe Hansom, and stock in both the Tokop Consolidated and the Tokop Gold Mining Company.

Work on all three properties is being pushed

Company.

Work on all three properties is being pushed with vigor, and ore is already being sacked from the diggings near the surface.

CALIFORNIA.

Ban Francisco, March 15.—The Mount Marerson mine in Tuolumne county, which was shut down last August by a labor strike, will be sunk an additional 200 feet, making it 700 feet in depth. The Mount Jefferson vein is a true fissure with three intersecting veins, all showing good ore. Free gold is visible in nearly all the ore, but the main value is in sulphurets.

The Sunshine mine, two miles southwest of Randsburg, has developed ore assaying \$100 per ton. The present depth of the shaft is 270 feet, and for 100 feet good ore is found, that at the bottom of the shaft assaying \$100. CALIFORNIA.

At the Mountain Mine in Sierra county, near Sierra Buttes, a vein was discovered recently in an upraise from tunnel No. 2, which runs over \$60 to the ton. It ranges from two to five feet in depth. COLORADO.

COLORADO SPRINGS, March 15.—The Rio rande Sampling Company has purchased be Eagle Sampler on Battle Mountain for the Eagle Sampler on Battle Mountain for \$100,000.

The Golden Cycle Gold Mining Company is credited with a plan to purchase and reconstruct the Telluride Mill, near Colorado City. The mill was built four years ago by New York capitalists. It was afterward sold to the General Metals Company of New York. Some months ago the latter failed. Abundant assets were found, but the adjustment of claims has not been finished.

Stratton's Independence Company, Limited, shipped 4,000 tons of ore from its mine in February. The lack of storage facilities is checking output.

rebruary. The lack of storage checking output.

A new vein has been encountered in the Gold King Mine on Womack Hill in entirely undeveloped territory which promises good

returms.

A cyanide mill is being erected in Pony A cyanide by C. B. Burch and others. The average of the ore to be treated is about \$4. Mr. Burch expects to realize 90 per cent. of this value. The La Belle Power Company will build an electric line into the gulch, which will materially aid in its development as a mining centre. mining centre.

SALT LARE, March 13.—The Silver Ring of Park City has just posted another dividend of \$100,000. This makes the third—\$300,000 in all—the company has paid out this year, swelling the total distribution to nearly \$2,000,000. At no time in the history of this famous property has there been so much ore in sight. UTAH.

The management of the Grand Gulch group The management of the Grand Gulch group of copper bearing mines on the ArizonaUtah strip, from which a thousand tons of ore have already been extracted, netting the company \$100,000, has encountered the ledge on its 400 foot level, which reveals an average of 20 per cent. in the red metal. A company of English capitalists, represented by Lewis Thomas, has purchased the June Bug group of claims, on told Mountain, Sevier county. Considerable development work has already been done on the claims, and operations of an extensive character are now promised.

1N THE BLACK HILLS.

LEAD, S. D., March 14.—Homestake stock.

LEAD, S. D., March 14.—Homestake stock has reached the price of \$50 per share. This is the highest since last August, when it went to \$52 a share. A telegram was received

## TONOPAH---GOLDFIELD---BULLFROG.

Readers of the adjoining columns of The Sun will note that the mining camps of the moment are the desert camps of Nevada fiamed above. If the lavesting public will study the many opportunities presented in the Goldfield, Tonopah, Builfrog

and other Nevada camps, and act when they are presented to him by his broker, he will make money, and servative capital in mining enterprises it is now. If there ever was a time when exceptional opportunity stood knocking at the public's door it is to-day. Though Goldfield and Tonopah are proclaimed by mining men of eminence as presenting astonishing mining conditions, the stocks of the companies operating these

are selling in many cases below known values, and in nearly all cases below the values which have been assigned by the public to other stocks under like conditions.

Tonopah is pronounced by many greater than the old Comstock, which produced \$630,000,000. Reputable engineers more than a year ago estimated a known value of \$75,000,000 in the original Tonopah wine alone, though it was developed only to the seven hundred footlevel, and it is not unreasonable to surmise that in this wonderful group of mines the record of the old Comstock camp, where values were taken from a depth of 5,000 feet, will at least be engreeched. depth of 5,000 feet, will at least be approached.

The market value of all the "inside" mines at Tonopah to-day foots up only \$25,000,000, and the stocks these mines are therefore clearly very cheap from standpoint of merit. Before summer comes on the of these mines are therefore clearly very cheap from standpoint of merit. Before summer comes on the fact, stready patent to many well-informed men, will strike the great army of wide-awake investors with powerful and increasing force, and we shall see a built market in Tonopah and Goldfield issues which will rival the old Comstock excitement and will make the Cripple Creek boom seem petty by comparison. We are members of the only mining exchange in New York upon which these stocks are traded in. We are in constant telegraphic communication with all the markets. We receive quotations daily from Goldfield, Tonopah, San Francisco, Philadelphia and Pittsburg. We can give our clients better service than they can possibly get by "going to the Campa" or to San Francisco for their stocks.

We will quote the market by wire on any of these stocks at any time.

We publish the most interesting MARKET LETTER issued by any mining stock brokerage house in the United States, and do the largest general mining stock brokerage business. Our MARKET LETTER will be sent FREZ on request. We handle all mining stocks on commission basis. Let us know what you want to buy and what you have to sell.

CATLIN & POWELL CO., GENERAL MINING BROKERS. 35 WALL STREET, NEW YORK. Massachusetta Representative. Z. T. MERRILL, 35 CONGRESS STREET, BOSTON

# NEW 24 PHOTOGRAPHS FREE TONOPAH AND GOLDFIEL

IRVING K. FARRINGTON & CO., 15 WALL STREET, NEW YORK CITY.

by the management in this city this week from the head office of the company, at New York, stating that a 30 per cent, share dividend had been declared, to be paid March 25. This is the first double dividend to be declared by this company for nearly two years and a half. It will mean the distribution of \$109,-200 among the stockholders.

Nearly \$100,000 worth of this company's stock has been purchased by Lead Homestake employees within the last four months. The stock has been freely dealt in and has gradually increased in value. The Homestake company has in constant operation 1,000 stamps in six mills and saves 75 cents a ton from the tailings in two mammoth cyanide plants one of them being the largest plant of its kind in the world.

It is announced that the Big Four Mining Company will resume operations at its property in Dendwood Gulch on April 1. The shaft is down about 200 feet, following a strong vein of phonolite ore. The company has been reorganized and stock has been sold in western Missouri and Iowa for the purpose of furnishing money for further development work. The ore will assay about \$15 a ton.

DEADWOOD, S. D. March 14.—The Superior Chemical Reduction Company has a large force of mechanics employed at its mill in Deadwood getting machinery in place for the test run that is to demonstrate the new process worked out by Dr. J. A. Ogden of this city. Dr. Ogden has worked twenty-five years in Philadelphia and the Black Hills on a new process of treating all kinds of mineral bearing ores. He has organized a development company. A mill is being built in the first ward of this city, and it will have a capacity of 112 tons of ore a day.

By the process the ore is crushed finer than is usually done in the mills in use at present, and is kept constantly in motion by a series of conveyors. A new solution which acts more quickly than any now in use in the Black Hills mills will be employed. It is asserted that the actual cost of treatment will be greatly lessened, a much higher extraction will be secured and

The mill will be in operation of the days.

James Hardin, the general manager of the Branch Mint Mining Company, has returned from New York and Chicago, where he succeeded in raising additional capital for the completion of the company's cyanide plant at Galena. Work is to be resumed immediately, both at the mill and the three mile railroad track which is to connect the mine with the mill.

MONTANA.

MONTANA.

Helena, March 15.—At a depth of 2,300 feet an eleven foot vein of coal has been atruck in the properties of the Amaigamated Copper Company at Storrs. This is significant matter, inasmuch as the Amaigamated company is the largest consumer of coal in the State and the finding of such a large vein will mean a good saving, as Storrs has ample railroad facilities and is not far from Anaconds.

As a result of the action of the railroads in making a proportionate rate, dependent upon the grade of the ore, the East Helena smelter is receiving large quantities for treatment. The Florence mine at Nehart reatment. The florence mine at Nehart could not have been handled except for the reduced freight rates.

alone has contracted for the delivery of 15,000 tons of low grade ores that could not have been handled except for the reduced freight rates.

The Whitlatch-Union mine, four miles south of Helena, is shipping ore regularly to East Helena. For many years this mine was the banner gold producer of the State, but has lain dormant for a number of years until taken over by a local syndicate. A new shaft was sunk to a depth greater than the old workings and it is from the new ore bodies recently discovered that the shipments are being made.

An unusually rich copper strike has been made in the Bertha claim near Corbin, Jefferson county, which is under lease to Miller & Crosby. While the vein has not been thoroughly tested as to width, samples taken from it show 30 per cent. copper and seventy ounces of silver to the ton. Corbin is in what is known as the Wickes district, fifteen miles south of Helena.

The Piegan Company has acquired the celebrated Gloster group of mines near Marysville. The Gloster in the early days troduced upward of \$8,000,000, and is believed to still contain good values. The Piegan Company will erect a stamp mill for the joint treatment of the product of its own properties as well as those of the new acquisition.

A remarkably large body of rich gold gravel has been discovered in the Eglanol properties in Lincoln Gulch. The bedrock drain has been run for a distance of 4,000 feet, the last 300 of which were in the rich channel from which gold was taken in the early days of placer mining in that district. The property is owned by Helena men.

Lewistown, March 8.—F. M. Curtis and R. W. Dorn of Jamestown, N. Y., arrived here this week to make an examination of the Maginnis property at Maiden, near this city. Dorn and Curtis are two of the men who have a bond on the Maginnis, which is owned by W. G. Conrad, the banker, of Great Falls. They were met here by Supt. Crabtree, who escorted them to the mine. It is said that they are very highly pleased with the showing made at the property. Regular shipment

ARIFONA.

BISBEE, Ariz.. March 18.—The February production of copper from the mines of this city was 7.085,000 pounds from the Queen and 2.484,000 from the Calumet and Arizona. The Queen is to add more furnaces and the Calumet has two new 300 ton stacks that will be running in May or June, thus doubling its capacity.

be running in may or June; the decision of the conscience within the past few days the Junction shaft has gone down into ore, and the daily hoist is now largely copper fit for the smelter. Water has been cut in such quantity that the new pumping plant has been started up at full speed. The plant consists of 3,000 gallons a minute in sinkers and two 1,500 gallon and one 500 gallon station pumps, installed on the 770 foot level in a large station. For the past three weeks the large plant at the Pittsburg has been unable to do more

than hold the volume of water coming in there but with the aid of the Junction it will be able to get down once more. Water in Junc-tion is now about 35 feet higher than in Pitts-burg shaft.

LAKE REGION IRON MINES.

DULUTH, Minn., March 15.—As the season of navigation draws near preparations for record breaking ore output increase. Mine after mine that has been idle is getting into shape for production, and as fast as competent men are found they are put to work in the underground mines of the region. More and more stripping contracts are let on the Mesabs, old mines are being unwatered on the Gogebic and Menominee and the Marnette is the scene of great activity.

The Pilisbury Mine, at Hibbing, is to be stripped and become an open pit steam shovel mine. It has been mined underground. A large amount of earth will be moved this year and the mine will ship heavily next year. Welsh Mine of the Commonwealth fron Company near Florence, is to be opened and operated this year. The shaft is 300 feet deep and is bottomed in a thin lense of ore. Extensive development will be carried forward to determine its size. An exploratory plant that has been on the ground will be placed three miles away, at the Buckeye, where a shaft will be sunk at once. The company's Badger mine has been abandoned, as exhausted. It is estimated that centracts for the shipment of iron ore down lakes this year have LAKE BEGION IRON MINES.

Bauger mine has been abandoned, as exhausted.

It is estimated that contracts for the shipment of iron ore down lakes this year have been closed to the amount of about 10,000,000 tons in excess of what the various companies owning steamships are to carry for themselves. Probably at least 25,000,000 tons are now arranged for for lake delivery. The rates are five cents a ton better than last year, and there is a difference to the shipping interests of the lakes of about \$1,500,000 in net profits. Shipping of ore will begin in about three weeks, and mines will be forwarding to docks in less than two weeks.

Mrs. Harriet Webb, 28 years old, a servant at Mrs. Dressler's furnished room house, 156 West Fourteenth street, committed suicide yesterday by inhaling gas. George Gale of 626 Halsey street, Brooklyn, a brother, identified the body, but could give no reason for the suicide.
